PETER SEKESAN

SOFTWARE ENGINEER

I am a motivated, driven and passionate software engineer with a background in events management. The smallest details matter, and that is something I pride myself on. As a coding program graduate, I strive to learn something new every day and look to tackle any challenges head on.

PROJECTS

Github Finder / [Demo](#) | [GitHub Repo](#)

February 2021

Technology Stack: Javascript - CSS - HTML - React - GitHub API

React application to search for GitHub users. The application uses the GitHub users API to pull in data of any user searched for. Using React with Hooks to render the client side displaying a personalized bio page of each user.

News of Yesteryear / [Demo](#) | [GitHub Repo](#)

December 2020

Technology Stack: Javascript - CSS - HTML - jQuery - Library of Congress API

Developed an app based on my love of microfilm. I utilized the LOC Chronicling America API to allow a user to search a topic and select an amount of results they would like returned. The results, rendered with jQuery are newspaper scans dating from 1789-1963.

Disney Quiz App / [Demo](#) | [GitHub Repo](#)

November 2020

Technology Stack: Javascript - CSS - HTML - jQuery

A short quiz app dedicated to one of my favorite subjects, Disney Parks! Using jQuery to interact with a STORE file of correct and incorrect answers, the app displays the questions with multiple choice and keeps a running score and total of your progress.

PROFESSIONAL EXPERIENCE

CANON USA INC. Events Management Specialist • Melville, NY • 2012 to 2020

- Leveraged leadership expertise to direct all aspects of major media events and trade shows, with a focus on enhancing brand visibility and market share.
- Excelled as the lead planner for major events, including the *Super Bowl*, *Kentucky Derby*, and *Indianapolis 500*.
- Oversaw extensive budgets and engaged in contract negotiations.
- Served as a member of strategy teams and collaborated with marketing directors on strategic planning.
